主要顾问：

Skidmore, Owings and Merrill

DESCRIPTION

This roof garden plaza over a parking structure is designed to maximize seating for noon-time users. With a variety of intimate spaces, the plaza is flush to the surrounding pedestrian paths and allows free pedestrian flow through the space to the building entrances.

The soil depths in the plaza vary from 18"-24" to minimize roof deck load. Hedges are used to structure planting zones for annuals and perennials. Seatwalls frame the geometric planting areas allowing efficient seating and public use.

描述

这个广场在一个停上面。为了提供给中午休息时间的人最多的座位，设有各种不同的空间。广场使行人自由流动到楼的入口处。土壤厚度达到18-24英寸，以减轻屋顶载重。

篱笆把年生植物与四季植物分成为不同范围。几何图形的花坛被矮墙围绕了以便行人休息。
