旧金山市，加州

Description

The landscape design for the IDEC corporation's office and computer manufacturing facility aims at creating an employee friendly environment while enhancing corporate image.

The alternating bands of paving flow along a curvilinear curb to create an unique entrance to the facility. Innovative site furniture in the form of bollards, signage and triangular elements create points of visual interest along the entrance pathway. Flowering plum and cherry trees are used along the pathway to add seasonal color.

Basketball courts, tennis courts and a stage are included in the design of the landscape around the building. The landscape reaches all the way out to the property line to engage both visitors and the neighborhood.

描述

当IDEC公司迁到了新的高科技地区，他们需要一个员工锻炼身体的设施。有一部分是室外活动中，包括了室外野餐桌椅和一个室外舞台。给员工带来了很友善的环境。地面设计达到了地带权两端，吸引了周围的行人。
