

Ponderosa Estates Affordable Housing Marin City, CA

Schematic Design / Construction Documents & Construction Administration

As part of a renovation of the entire development, an expanded playground was requested. The previous playground had little play equipment which did not meet the safety code. The sand surface had been worn away to bedrock, creating an unsafe and unattractive area.

Working with the residents' Mother's Committee, we reviewed play equipment choices, solicited input from play equipment manufacturers, and agreed upon equipment which reflected the residents' preferences. The equipment is very popular with the kids and gives them a safe place to play with parent supervision.
