Ivelich & Tucker A.I.A.

**Description**

Located on a long narrow site in downtown Sonoma, California, Westlake Housing includes a 35' x 300' long garden enclosed by two-story building units. The landscape design breaks up the linear garden space into smaller areas, each with its own character, including a grove of birch trees, a trellis structure with climbing roses, a cascading fountain, and an outdoor dining area. Seating in each of these areas provides places for residents to sit and enjoy the pleasant landscape setting.
